

REFUEL READMISSIONS

The road to reducing readmissions is a challenging one that requires incredible endurance, stamina and the ability to constantly adapt to changing road conditions. We invite you to join us as we **REFUEL** Readmissions during a three-phase project over the course of six months. This action-driven project has been designed to accommodate motivated facilities of all sizes. Each phase contains opportunities to customize project work to your facility and **REFUEL** your readmission reduction efforts.

GOAL:

Support the Partnership for Patients goal to reduce all-cause 30-day readmissions by **12% from your baseline rate.**

Detailed project information including commitment to participation, timeline, benefits to participation, all project webinars and resources are located on the project's webpage available at: <https://www.ihconline.org/compass-hiin/hiin-resources/hiin-focus-area-resources/readmissions/readmissions-refuel-project/>

Contact Compass HIIN Program Manager, Kate Carpenter at carpenterk@ihconline.org with questions or for more information.

PHASE ONE

Leadership, teams, readmission data collection/analytics and selection of your project patient population
